

Product Code: OB41CTDF400

Description: OB41 Cut Tap & Drill Fluid Spray 400ml Aerosol

Benefits

- Provides a high degree of finish quality
- Ideal in Reaming, Tapping and Drilling
- Offers excellent penetrative qualities
- Suitable for fine thread work in ferrous metals and high tensile steels

OB41 Cut Tap Drill Fluid contains a special blend of extreme pressure and lubricity additives in a mixture of fine highly refined mineral hydrocarbons providing a high degree of finish quality. It is primarily intended for use on cast iron and all steels including high tensile where the fluid is applied directly to the work piece and tap. Ideal in Reaming, Tapping and Drilling applications where a thin, fast flowing lubricant is required for improved penetration and heat dissipation. Its specialist formulation providing a very low viscosity product offering excellent penetrative qualities. It has excellent penetrative qualities and so is suitable for fine thread work in ferrous metals and high tensile steels.

Application

It is primarily intended for use on cast iron and all steels including high tensile where the fluid is applied directly to the work piece and tap. Ideal in Reaming, Tapping and Drilling applications where a thin, fast flowing lubricant is required for improved penetration and heat dissipation. It has excellent penetrative qualities and so is suitable for fine thread work in ferrous metals and high tensile steels.

Additional Information

Odour		Oily
Density		0.885

Shelf Life

24 months from date of manufacture.

Health & Safety

We recommend that you view the Safety Data Sheet (SDS) for further information on the product before use.
