Rointe CONNECT

1 Download the Rointe Connect app
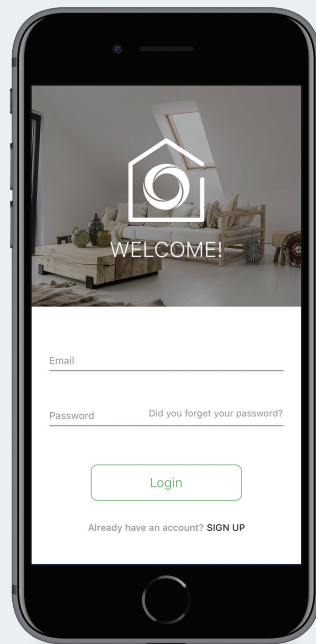

Download and install the free Rointe Connect app from the store on your smartphone or tablet. Available at Google Play for Android* and the App Store for iOS**.

Rointe Connect is also available online at www.rointeconnect.com

Once you have installed the app, complete the **E-life Technology registration** by entering your details, a valid email and password.

WELCOME!

Email

Password   Did you forget your password?

Already have an account? SIGN UP

Download on the **App Store**

GET IT ON **Google Play**

Available in **Web App**

* Android 5.0 or higher. ** iOS 11.0 or higher.

2 Create your installation & add zones

Log into the Rointe Connect App with your **email and password.**

On the main screen you must press the (+) button to create an installation. Now, follow the **installation setup wizard.**

Enter a name, select your location by pressing and holding down on the blue dot which represents your current location, select your time zone (GMT) and personalize by selecting a colour and an icon.

After this, **add as many zones as you wish**, differentiating between zones that contain other zones or products. A zone with a product is known as a final zone.

Create a zone

Add product

Select new heating product:

Radiator   Thermostat CT 2   Towel rail

Water heater   Smart Touch   Not now

Or you can create a zone which you have already created.

3 Pair your product

On the Rointe App, select the final zone in which you would like to pair the product (for example: living room). Press the menu button (••• on iOS, ⁝ on Android) and select the option **"Add product".**

Press the menu button (≡) on the keypad of your product. On the menu screen, using the (←) and (→) buttons to navigate and (⏻) to enter, access the configuration sub-menu (🛠) and select the Wi-Fi option (�widehat{}).

The screen of your product will change to red, showing a picture like the one below. This means that you have **successfully activated** the pairing mode.

Your product will create a Wi-Fi network that you will connect to use the access information shown on the screen.

NET: ROR_0001
PIN: 12345678

000000000000
000000000000
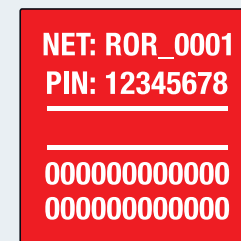

4 Pair your products with the app

Make sure that you are connected to the Wi-Fi network that you want to connect your product to and continue with the pairing guide, entering your Wi-Fi password when asked.

Next:

 On iOS, in the phone settings, connect to the Wi-Fi network that your product has created (**NET:**) entering the password (**PIN:**). Go back onto the Rointe App and confirm that you are connected to your product.

 On Android, select your products Wi-Fi network (**NET:**) and it will automatically connect to the product.

If this process has be done correctly, your product will restart and the colour of the screen will turn green (by default). Select **"Check configuration"** to finalise.

Your D Series is now configured! ✓
